

Joshua Frank

AI Engineer — Agentic Systems & Tooling

Self-taught · 15+ years shipping mobile products at scale

josh@joshfrank.com · github.com/frankjoshua · tesseractmobile.com · St. Louis, MO

SUMMARY

Self-taught engineer with 15+ years shipping mobile products at scale. I build the tooling AI agents run on — MCP servers, live agent UIs, and multi-agent workflows — and use agents to ship fast. Founder of Tesseract Mobile; built and sold apps with 5M+ downloads.

SKILLS

Agentic AI: MCP (Model Context Protocol), Claude / Claude Code, LLM orchestration, agent tooling, prompt evaluation

Mobile: Kotlin, Flutter / Dart, Jetpack Compose, Android SDK

AI / ML: Stable Diffusion, SAM, NVIDIA CUDA, computer vision

Infra / DevOps: Docker, Ansible, Firebase, Python, GPU ops, monitoring

EXPERIENCE

Tesseract Mobile

St. Louis, MO · 2008 – Present

Founder & Lead Developer

- > Built and shipped 15+ mobile apps across Android and Flutter — 5M+ combined downloads.
- > Built MonAI, a production AI image platform serving 100K users: GPU inference, request routing, real-time websockets, and monitoring.
- > Wrote MCP servers and agent tooling that connect LLM agents to production systems and hardware, including ROS2 robots.
- > Built and sold Solitaire Free Pack (5M+ downloads) — a seven-figure acquisition.
- > Own the full stack: product, mobile, backend, GPU infrastructure, and DevOps (Docker, Ansible, Firebase).

Earlier ventures

Founder

- > Founded and ran two prior technology companies — TechCentric and Archway Technologies — before starting Tesseract Mobile in 2008.

SELECTED PROJECTS & OPEN SOURCE

- | | |
|--|--|
| > <code>docker-ros2-mcp-server</code> — MCP server letting LLM agents drive ROS2 robots. | > <code>monai_mcp_server</code> — exposes my production AI platform to agents. |
| > <code>agent-canvas</code> — live browser UI for Claude Code sessions. | > <code>cobot</code> (contributor) — Telegram ↔ Claude Code bridge. |
| > <code>rosserial_arduino_lib</code> — ★ 63 — Arduino ↔ ROS serial library. | > 136 public repositories at github.com/frankjoshua. |

Talks: "Beyond Vibes — Making AI-Assisted Coding Work" (2026); "Context Is the New Compute" on MCP (2025); LangChain (2024). Regular speaker, St. Louis Robotics Association.

COMMUNITY & EDUCATION

- > President, St. Louis Robotics Association (2018 – 2024).
- > Chess: tied 1st, 12th-Grade National Champion; Missouri Rapid Chess Champion.
- > Self-taught — home-schooled with a self-directed education, continued throughout a 15+ year career. 130+ public repositories.
